- A.S.S.E.T ADVANCED DIVE TECHNICIAN
- BAUER SERVICE TECHNICIAN
- APEKS, AQUALUNG, MARES, SCUBAPRO, CRESSI

Starting at an early age I was bitten by the diving bug on a family holiday in the Caribbean. I spent my teenage years diving up and down the English coastline with the occasional holiday to the Red Sea or Malta.

As soon as I turned 18, I went off to America where I started my professional career with NAUI, IANTD and TDI. The next 18 years were spent working abroad in the Caribbean, Australia and South East Asia teaching everything from Discover Scuba Diving up to Trimix and running various dive centres.

Somewhere in the middle of all that I took a break from the recreational side of diving and spent 2 years working in the commercial industry. I mainly worked as a salvage diver but also on various salmon farms, canals and boat maintenance.

My main advice for divers is don't get caught up chasing qualifications. They are very important but don't forget the main reason for getting into this sport is to GO DIVING AND HAVE FUN!! (and a deco beer or two as well)
